Work Experience

- Senior Software Engineer | Policygenius Nov 2019 - Present
Designed architecture to display quote estimates from third-party carriers within the Home & Auto product experience
Currently leading effort to build a shared design-system component library for our web applications
Active leader in company culture: planning hackathons, giving tech talks, evangelizing new technologies/processes, etc.
- Senior Software Engineer | Conductor May 2018 - Oct 2019
Designed and built a re-imagined ETL process for customers' website analytics data, along with a data visualization webapp to provide full, customizable access to that data. (Also built internal tooling to help us manage the ETL)
- Engineering Manager | Web.com (Formerly Yodle) May 2017 - May 2018
Architected and built a data-driven, mobile-first webapp which provided data visualizations for their marketing insights.
- Senior Software Engineer | Yodle March 2016 - May 2017
Engineered robust reporting framework on top of Elasticsearch data to facilitate data-driven Business Intelligence dashboard for enterprise customers.
- Software Engineer | Yodle June 2014 - March 2016
Developed various products for enterprise customers, including Appointment Booking, Offers/Coupons, and others.

Personal Projects

- Abra abra.kenrg.co
A modern, statically-typed programming language, which compiles to bytecode for its own VM.
Tooling: a vscode extension, a language-server protocol implementation, and a documentation/playground site (using wasm).

Languages & Frameworks

- Backend: NodeJS, Ruby, Java, Python, Rust | Rails, ExpressJS, Spring, JUnit | GCP, k8s, S3, Lambda
Frontend: TypeScript, JavaScript, SCSS | React, Redux, Backbone, JSPs

Technologies & Competencies

- REST, GraphQL, gRPC, Microservices, Postgresql, Elasticsearch, CI/CD, Testing, Agile/Scrum

Education

- BS in Computer Science & BA in Mathematics | Bucknell University May 2014
